

# Paxton's Green Policy

## Our environmental approach

We aim for a world-class approach in all that we do and to us that means always striving for continuous improvement.

We want to build a thriving company that contributes positively to the world we live in, today and for the years to come. Today we have a focussed team of Paxton professionals, fully trained on carbon literacy, that are working on our journey to become a net zero company.

# Journey to net zero

In 2024 we measured our first ever carbon footprint and embarked on a clear and focussed reduction plan to improve our impact on the environment.

Working with Carbon Footprint Ltd to ensure accurate data reporting, we recorded a total of 2,541 tCO<sub>2</sub>e produced in 2022. That is equivalent to approximately 1,550 economy return flights from Heathrow to New York.

“While we embark on our net zero plan, we have already made some significant

**changes to how we operate both prior to, and in direct response to, our carbon footprint report.”**

“We are carbon neutral certified in the UK, France, Germany, and South Africa.”

Carbon

Organisation

“We reuse or recycle up to **70%** of any product returned to us, limiting waste wherever we can”

## Transport

- Transition from **air freight to sea freight** when shipping products and components globally
- Reviewing travel and transportation policies – currently **98% of company fleet are electric or hybrid vehicles**

## Products

- Paxton products are built to last and come with an industry leading **5-year guarantee**
- **Our systems help save energy** by switching utilities off when a building is empty
- We believe in **limiting the need for our printed materials**, which are fully recyclable

## Renewables

- Switched to **100% renewable energy tariffs** on all UK premises
- Invested in solar panels on our newest UK premise, the Paxton Electronics Centre
- Continue to invest in renewable technology across Paxton’s facilities

## Manufacturing

- Our manufacturing facilities meet **ISO 9001** and **ISO 14001** certifications
- Invested in efficient manufacturing machines that **automatically switch off to save energy**
- **Plastic injection moulding facility** in Eastbourne – reduces further on the procurement and shipping of plastic components globally

## Work space

- We operate **zero waste to landfill** of general waste at our UK sites
- Our **energy saving security systems** are installed across our sites to control lighting
- On-site, uniquely designed in-house **zero waste café**, where all packaging is biodegradable

“We operate **zero waste** to landfill of general waste at our UK sites”

**“This is the  
first step on  
our journey to  
become a net  
zero company,  
something we**

**plan to do well  
in advance of  
the 2050 limit.”**
